

Future Cooperative Actions of the IG-WRDRR

1. Implement the HFA in the area of wind-related disaster risk reduction

**Contribution to the Global Assessment Report by UNISDR
Reporting to the Global Platform for Disaster Risk Reduction**

2. Establish a database/warehouse of the latest information/technologies relevant to wind-related effects and their mitigation, including sharing good practices

Further development of the VORTEX-Winds

3. Facilitate technology transfer that attends to the needs of local communities exposed to disasters around the world

Continue to support the national and community level:

- Bangladesh – tornado disaster risk reduction policy making assistance and proposing mitigation strategy, including the introduction of storm/tornado shelter
- Design of the shelter and demonstration event at the community level is planned in Bangladesh, January 2011
- Haiti brochures on preparedness for wind-related hazards (interim work is done)
